DELIVERY POLICY

Comtech makes every effort to drop trusses at a residence without causing any damage to the homeowner's property. Excessive weight on some types of driveways, driving over septic tanks and lines, and placing trusses on grass may all cause damage to your property. It is suggested that you clearly mark your septic tank box and lines to avoid damage.

By signing below, you are agreeing that Comtech has permission to drive on your driveway and is not responsible for any damage to the driveway, and has permission to drop the trusses in your yard but is also not responsible for damage to your grass. Comtech is not responsible for damage to septic tanks or lines if they are not clearly marked.
